

# ANNE MAXX OPTIMIZE MICRO

BY CROPLAND SOLUTIONS INC

## Product Overview

Patented spray water conditioner. Acidifies spray water and reduces water hardness. Reduces chemical interactions with dissolved salts in spray water. Color indication system changes color to yellow at neutral pH and pink when pH is below 5.0. This enables to choose the right pH for your spray water.

## What is it?

A 6-in-1 patented spray water conditioner.

- Acidifies spray water.
- Reduces water hardness.
- Reduces chemical interactions with dissolved salts.
- Color indication system changes color to yellow at neutral pH.
- Changes to pink when pH is below 5.0.
- Enables you to choose the right pH for your spray solution.

## Dosage

- 2-4 litres per 4000 litres of water depending on the spray water pH and hardness.

## Where to Use?

- Recommended for all foliar applications mainly during in-crop spray applications.

## Guaranteed Analysis Active Ingredients

Total Nitrogen (N) .....	3.00%
Available Phosphoric Acid .....	7.00%
Sulphur .....	5.00%
Zinc .....	1.00%
Manganese .....	1.00%
Boron .....	1.00%
Polyethylene glycoltert-octyl phenyl ether .....	5.00%
Amino Acids .....	24.00%

Contains hydrolyzed soy.

## Features & Benefits

- Conditions and acidifies spray water to assist chemical stress in crops and increase foliar uptake.
- Fortified with N-P-S-Zn-Mn-B.
- Amino acids aid in efficient uptake into the plant.

AVAILABLE IN 1000L TOTE AND 10L JUG
